# About Us

## something about us

IF Webtoon is a webcomic application and foundation that aims to give users quality webcomics from various authors and artists, while also providing a source of income for said authors or artists. We give users a bunch of comics to read that can be accessed with ease from a touch (or a click!).

## if webtoon in 2020

IF Webtoon strive to provide authors and artists alike some support for their works, and serves as a platform for users to interact with and support the authors works. With the method of premium and free users, it is supposedly gives all parties that uses this platform to gain profit as well as a place to entertain oneself in free time.

## Our Story

### 2010

#### IF webtoon offline store

IF Webtoon offline store provides merchandises, art, and physical comics from various artists for users to buy.

### 2015

#### IF Webtoon planning about open an webtoons

IF Webtoon first plan about making a webtoon due to various artists that needs more recognition and an income for their living. for that matter, IF Webtoon created this platform for authors to gain profit from making what they love or what they are passionate about. also, it gives users a place to read many comics from various authors as well, it's a win-win situation!

### 2019

#### IF webtoons and teams start to make a web comic

Our teams gather various information and researches on how to support the artists while providing access to comics for our free users. We started by making two types of comic users, one being free and one being "premium". The only difference between the two is that premium users can read comics unlimited while free users needs to wait or watch ads to read comics.

### 2020

#### IF webtoon offline store

After we settle on the methods and ways to launch this project into a full-fledged web-comic site that provides users with various comics. We can finally make the site go online with the help of supporters and sponsors.
